Ref. Recommendation Letter for Mrs. Esperanza Buitrago Díaz

I am writing to highly recommend Mrs. Buitrago, whom I have known since her mathematics student days. Back then, we met in several conferences and specialized courses. Since then, Mrs. Buitrago has consistently ranked among top students in her degrees, placing top three in numerous evaluations. Her ability to solve complex problems with analytical rigor and creativity has been evident since I met her.

One of the most impressive things about Buitrago is her evolution: she not only has worked successfully in academia back in the time, but has decided to apply the mathematical foundations to real-world problems. Her transition to Data Engineering to Cybersecurity was with the same determination as I have always worked alongside. In joint projects, she demonstrated abilities to lead the design of data pipelines and build robust applications applying Software Engineering concepts. Her approach is systematic: she analyses each component, anticipates failures, and ensures traceability.

Furthermore, her ability to manage multidisciplinary teams is remarkable. At conferences, projects and workshops, I have seen her coordinating working groups, communicating technical ideas to non-specialized audiences, as well as publishing and writing in academic environments. She is not afraid to take on responsibilities in order to go above and beyond.

Finally, when she finished the latest certificates on Cybersecurity, she demonstrated constantly for what I have known her for: commitment to

continuous learning. When she combines her logical foundation with a practical approach to security, makes herself ideal for environments that demand reliability and data protection.

I wholeheartedly recommend Mrs. Buitrago. Any organization that has her in their team will gain a dedicated, hardworking professional with exceptional analytical skills, as she is well prepared technically, has responsibility, a strong sense of duty and is fully committed to the project she gets on board. Her motivation, in particular, may be considered spectacular.

Sincerely,

A handwritten signature in dark ink, reading "Yeko Contreras R", followed by a horizontal dashed line.

Dr. Prof. Yeko Contreras Rojas
